## HOW TO PLAY

The object of the game is to get to a point count closest to 9 on whichever of two possible hands the player wagers. All cards count at face value, except for 10s and face cards, or any combination of them, which have no value. For example: 9+5=4; Jack+1 = 1.

There are three main ways to wager: the Banker hand, the Player hand, or the Tie. A player may wager on a combination of Banker and Tie or Player and Tie. After all wagers are placed, four cards are drawn face down from the dealing shoe. The first and third cards are the Player hand and the second and fourth cards are the Banker hand. If the point count in either hand is 8 or 9 in the first two cards, the hand is over, and no additional cards will be drawn. If not, the Player hand will draw a third card if that hand totals 0 through 5. The value of the third card drawn determines if the Banker hand receives a third card. No more than one additional card will be drawn to each hand. The hand closest to 9 wins. If both hands have the same total, the hand is a Tie. Banker and Player wagers do not lose and anyone who bet on the Tie wins at odds of 8 to 1. Any winning Banker and Player wagers are paid at odds of 1 to 1. Winning Banker hands are charged a 5% commission that is paid at the time of the payout. All wagers are made in increments of \$5. When wagering only the Tie, the wager must meet the table minimum.
