PLAYING THE GAME

Roulette is easy and fun to play.

HOW IT WORKS

The roulette wheel has 39 different numbered slots that correspond to the 39 different numbers on the table layout.

There can be a maximum of seven (7) players at one time per table.

Players may trade in their cash/currency for non-value playing chips to be used on the roulette table. These non-value chips can be exchanged for value chips or a different color non-value chip at the roulette table. Under no circumstances will cash, currency or coins be accepted as a wager.

Before the Dealer announces "no more bets", a player may place their non-value chips in the appropriate area of the roulette layout. I.e. If a player wants to place a wager on the next outcome to be a black labeled number, the player may place their non-valued chips in the box marked for a "Black bet". Players may make a wager before the ball is placed on the roulette wheel.

Each player is responsible for the correct positioning of their wager(s) on the roulette layout regardless of whether they are assisted by the Dealer.

The dealer spins a ball clockwise around the rim of the wheel as the wheel itself is spinning in the opposite direction. While the ball is still rotating around the wheel in the track, the Dealer will announce "no more bets", along with a waving motion across the table. The ball will come to rest in one of the numbered slots and the dealer will mark that number with a plastic marker on the table. All bets on the number, and associated with the number, win.

Hard Rock Casino Rockford reserves the right to call "no spin" in any situation deemed appropriate to protect the integrity of the game so long as a reasonable attempt is made to call "no spin" prior to the ball dropping into a slot on the wheel.

PLAYING THE GAME

BET DEFINITIONS YOU MAY NEED TO KNOW

- "Column bet" a wager placed on all twelve (12) numbers in one (1) column
- "Dozen bet" a wager placed on any of the following:
